

ReelSpy — Product Overview

For everyone. No code, no jargon. This is what ReelSpy does and why it helps you grow. **More:** [01-technical-documentation.md](#) (for engineers) · [03-pitch-deck.md](#) (slides).

The one-liner

ReelSpy is your unfair advantage for short-form video. It watches the creators you admire, tells you exactly which of their reels are blowing up right now, learns what made them work, and helps you turn that insight into your own original videos — then posts them everywhere for you.

The problem it solves

Growing on Reels, TikTok, and Shorts is a guessing game:

- 🤖 **You don't know what's working** until it's already old news.
- 🕵️ **Manually stalking competitors** eats hours and you still miss the breakout reels.
- 📄 **Staring at a blank page** every time you need a new script.
- 🔄 **Re-uploading the same video** to four platforms, one tedious upload at a time.
- 💬 **Replying to every "link please" comment** by hand, or losing the lead.

ReelSpy turns all of that into a few clicks.

How it works — the 4-step loop

flowchart LR

```
A["1 · WATCH<br/>Add accounts<br/>you want to learn from"] --> B["2 · SPOT<br/>See what's going viral<br/>ranked automatically"]
B --> C["3 · CREATE<br/>AI writes an original<br/>script in your voice"]
C --> D["4 · PUBLISH<br/>Post to IG, TikTok,<br/>YouTube & FB at once"]

```

1. **Watch** — Tell ReelSpy which Instagram accounts inspire you (competitors, niche leaders, people in your lane). Group them however you like — "Angular", "Memes", "Fitness".
2. **Spot** — ReelSpy imports their reels and **scores each one for virality**, then shows you a **"Rising Now"** shelf of the fastest-growing reels so you catch trends *while they're hot*.
3. **Create** — Pick a reel for inspiration. ReelSpy can **transcribe** it so you can study the exact hook, then **Claude AI writes you an original script** — hook, body, and call-to-action — in *your* voice. Never a copy.
4. **Publish** — Upload your finished video once and **cross-post** it to Instagram, Facebook, TikTok, and YouTube. Schedule it for later if you like.

What's inside — feature by feature

 Section	What it does for you
Dashboard	Your home base — a snapshot of activity and what's rising.
Accounts	Add the creators you want to learn from. Organize them into groups. Bulk-import who you follow.

Feed	Every tracked reel, sortable by virality score , with a " Rising Now " shelf of breakout content. Favorite, hide, or mark reels as "done".
Hook Library	The opening line of every reel you've transcribed, all in one searchable list — study what stops the scroll, then remix it.
Scripts	AI-generated original scripts saved as drafts, ready to film.
My IG	Analytics on your own account, plus 5 AI-written, data-driven growth tips based on your real numbers.
Auto-Reply	When someone comments a keyword (like "link"), ReelSpy automatically replies publicly and sends them a DM with your link — for Instagram <i>and</i> YouTube.
Publishing	Compose once, post to IG, FB, TikTok & YouTube. Per-platform captions, scheduling, private/public control.
Calendar	See your scheduled and drafted content laid out by date.
Connections	One place to connect/disconnect every social account.
Settings	Preferences and your Instagram connection.

The features that make people say "wow"

🔥 Virality score & "Rising Now"

Every reel gets a single virality number, weighted so **comments count most, likes next, views least** — because a comment means someone *cared*. "Rising Now" goes further: it ranks by **how fast a reel is growing per hour**, so a 2-day-old rocket beats an old reel with more total likes. You catch the wave early.

🗣️ Transcribe any reel → steal the *structure*, not the content

ReelSpy can pull the spoken words out of a reel and show you its hook. The **Hook Library** collects every opener you've captured so you can see the patterns behind viral openings — then build your own.

🤖 AI scripts in *your* voice

Point at an inspiration reel and Claude AI writes you a fresh **hook + body + call-to-action** — its own topic, its own angle, never a copy of the original. Built to sound like *you*, not a generic bot.

💬 Comment-to-DM on autopilot

Set a keyword and a message once. From then on, every matching comment gets an instant public reply *and* a private DM with your link — 24/7, on Instagram and YouTube. It never double-replies and never replies to itself.

🚀 Post everywhere, once

Upload your video a single time and send it to **Instagram, Facebook, TikTok, and YouTube** together — each with its own caption if you want. Schedule it and walk away.

Who it's for

flowchart TD

R[ReelSpy] --> C1["👤 Content creators
who post short-form video"]

R --> C2["🏢 Brands & social teams
managing multiple platforms"]

```
R --> C3["📈 Growth marketers<br/>chasing trends early"]
R --> C4["🎯 Niche experts<br/>turning expertise into reels"]
```

If you make short-form video and want to **spend less time guessing and more time creating**, ReelSpy is for you.

Why creators choose ReelSpy

Without ReelSpy	With ReelSpy
Scroll competitors for hours, hope you spot a trend	Breakout reels surfaced and ranked automatically
Guess what made a reel work	See the exact hook and structure, transcribed
Blank page every time you script	An original script drafted in seconds, in your voice
Upload the same video 4 times	Upload once, post everywhere
Miss leads in your comments	Every keyword comment answered + DM'd instantly
Watch your own stats and wonder what to change	5 specific, data-driven growth tips on demand

Your data is yours

- You only ever see **your own** accounts, reels, and scripts — everything is isolated per user.
- Your social logins are stored securely on the server and **never exposed to the browser**.
- ReelSpy reads only **public** information from the accounts you choose to track.
- Videos you upload are stored privately and shared only with the platforms you publish to.

In short

ReelSpy compresses the whole content loop — research → inspiration → scripting → publishing → engagement — into one tool. Watch the right creators, catch trends early, create original videos faster, and grow on every platform at once.

Ready to see it? Connect Instagram, add a few accounts to watch, and hit Sync.
