

ReelSpy — Product Overview

For everyone. No code, no jargon. This is what ReelSpy does and why it helps you grow. **More:** [01-technical-documentation.md](#) (for engineers) · [../BUSINESS-LOGIC.md](#) (plans & limits in detail) · [03-pitch-deck.md](#) (slides). Live at [reelspy.dev](#) · English & Arabic (full RTL support).

The one-liner

ReelSpy is your unfair advantage for short-form video. It watches the creators you admire, tells you exactly which of their reels are *over-performing right now*, learns what made them work, and helps you turn that insight into your own original videos — then posts them everywhere for you.

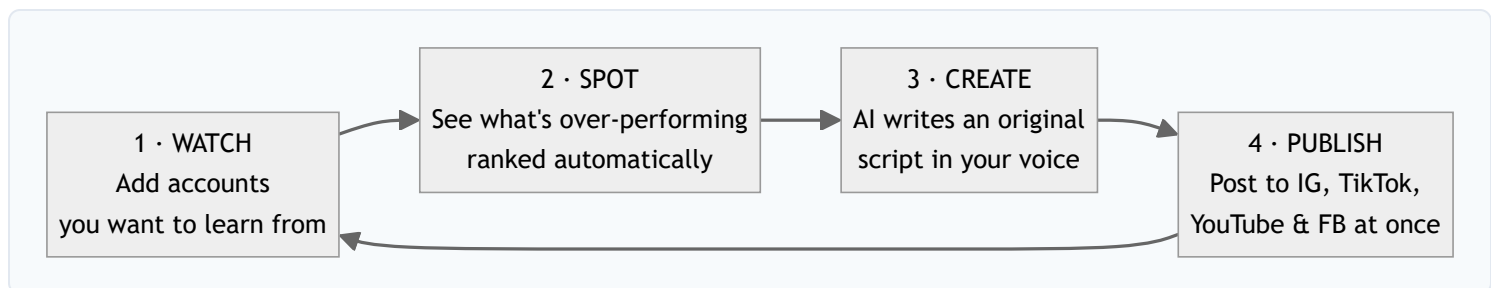

The problem it solves

Growing on Reels, TikTok, and Shorts is a guessing game:

- 🤔 **You don't know what's working** until it's already old news.
- 🕵️ **Manually stalking competitors** eats hours and you still miss the breakout reels.
- 📄 **Staring at a blank page** every time you need a new script.
- 🔄 **Re-uploading the same video** to four platforms, one tedious upload at a time.
- 💬 **Replying to every "link please" comment** by hand, or losing the lead.

ReelSpy turns all of that into a few clicks.

How it works — the 4-step loop

1. **Watch** — Tell ReelSpy which Instagram accounts inspire you. Don't know where to start? Take the **niche quiz** and ReelSpy suggests proven accounts in your niche — biggest creators first.

- 2. **Spot** — ReelSpy imports their reels and ranks them by how much each one **beats that account's own average** — so a small account's breakout hit outranks a big account's ordinary post. A **"Rising Now"** shelf catches reels exploding *this week*.
- 3. **Create** — Pick a reel for inspiration. ReelSpy can **transcribe** it so you study the exact hook, then **AI writes you an original script** — hook, body, call-to-action — in *your* brand voice (English or Arabic, Gulf or MSA). Never a copy.
- 4. **Publish** — Upload your finished video once and **cross-post** it to Instagram, Facebook, TikTok, and YouTube. Schedule it for later if you like.

What's inside — feature by feature

 Section	What it does for you
Dashboard	Home base — activity snapshot, setup checklist, what's rising.
Onboarding	4-step guided start: connect Instagram, set your brand voice & niche, add accounts (or grab a ready-made starter pack), sync your first reels.
Accounts	Add creators to learn from, organized into groups. Bulk-import who you follow. Smart suggestions for your niche.
Feed	Every tracked reel, ranked by out-performance (beats-its-own-average), with virality score sorting and a "Rising Now" shelf. Favorite, hide, or mark reels done.
Trends	 Niche Radar — what's over-performing <i>across your whole niche right now</i> , powered by anonymized intelligence across all ReelSpy users.
Hook Library	The opening line of every transcribed reel in one searchable list. Save the best ones. Study what stops the scroll, then remix it.
Scripts	AI-generated original scripts saved as drafts, ready to film.
My IG	Analytics on your own account, plus AI growth tips based on your real numbers.
Auto-Reply	Someone comments a keyword ("link") → instant public reply and a DM with your link — Instagram <i>and</i> YouTube.
Publishing	Compose once, post to IG, FB, TikTok & YouTube. Per-platform captions, scheduling. Studios can switch between up to 5 Instagram accounts.
Calendar	Scheduled and drafted content laid out by date, drag-and-drop.
Connections	One place to connect/disconnect every social account.
Billing	Pick a plan — or build your own with sliders.
Settings	Brand voice, niche, language (English/عربي), light/dark + color themes, preferences, data export.

The features that make people say "wow"

Out-performance ranking — find *true* outliers

Every reel gets a virality score (comments count most, likes next, views least — a comment means someone *cared*). But the feed's default ranking goes further: it compares each reel to **that account's own average**, so you see which reels *broke out* — not just which accounts are big. That's the content worth studying.

Niche Radar — your niche's pulse

ReelSpy anonymously aggregates what *all* its users track. The Trends page shows what's over-performing across your entire niche right now — intelligence no single account watcher can give you.

Transcribe any reel → steal the *structure*, not the content

Pull the spoken words out of any reel and see its hook. The **Hook Library** collects every opener so you can see the patterns behind viral openings — then build your own.

AI scripts in *your* voice

Point at an inspiration reel and AI writes a fresh **hook + body + CTA** — its own topic, its own angle, never a copy. It uses your saved **brand voice**, works in English and Arabic (Gulf or MSA style), and paid plans run on **Claude**, the same AI many pros use.

Comment-to-DM on autopilot

Set a keyword and a message once. Every matching comment gets an instant public reply *and* a private DM — 24/7, on Instagram and YouTube. It never double-replies and never replies to itself.

Post everywhere, once

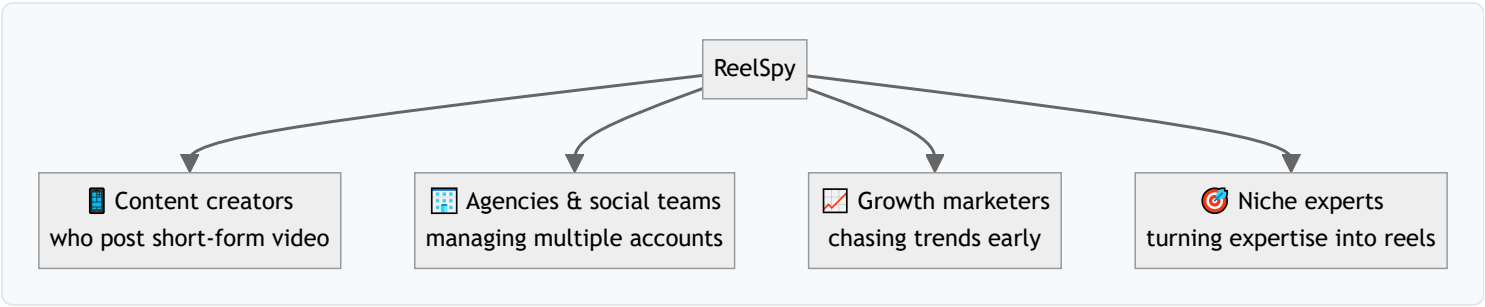

Upload your video a single time and send it to **Instagram, Facebook, TikTok, and YouTube** together — each with its own caption. Schedule it and walk away.

Plans

	Free	Creator	Pro	Studio
Price	AED 0	AED 49/mo	AED 149/mo	AED 349/mo
Tracked accounts	3	30	50	100
AI scripts / month	10	60	200	Unlimited
Transcripts / month	5	30	100	Unlimited
Auto-replies	—	15	30	60
Publishing	—	✓	✓	✓ + 5 IG accounts
AI model	Standard	Claude Sonnet	Claude Opus	Claude Opus

Don't fit a box? **Build your own plan** — sliders for accounts, scripts, auto-replies, and publish targets, priced live. Full details: [../BUSINESS-LOGIC.md](#).

Who it's for

If you make short-form video and want to **spend less time guessing and more time creating**, ReelSpy is for you.

Why creators choose ReelSpy

Without ReelSpy	With ReelSpy
Scroll competitors for hours, hope you spot a trend	Breakout reels surfaced and ranked automatically
Guess what made a reel work	See the exact hook and structure, transcribed
Blank page every time you script	An original script drafted in seconds, in your voice
Upload the same video 4 times	Upload once, post everywhere
Miss leads in your comments	Every keyword comment answered + DM'd instantly
Watch your own stats and wonder what to change	Specific, data-driven growth tips on demand

Your data is yours

- You only ever see **your own** accounts, reels, and scripts — everything is isolated per user. Niche intelligence is **anonymized** — nobody can see what *you* track.
 - Your social logins are stored securely on the server and **never exposed to the browser**.
 - ReelSpy reads only **public** information from the accounts you choose to track.
 - Videos you upload are stored privately and shared only with the platforms you publish to.
 - You can **export all your data** or delete your account at any time.
-

In short

ReelSpy compresses the whole content loop — research → inspiration → scripting → publishing → engagement — into one tool. Watch the right creators, catch true outliers early, create original videos faster, and grow on every platform at once.
