

ReelSpy

**Your unfair advantage for short-form
video**

*Spot what's going viral. Create it in your voice. Post it
everywhere.*

The short-form game is a guessing game

-  You learn what worked **after** it's old news
-  Stalking competitors burns hours
-  Blank page every time you need a script
-  Re-uploading the same video to 4 platforms
-  Chasing "link please" comments by hand

ReelSpy turns guessing into a loop

```
flowchart LR
```

```
A[1 · WATCH] --> B[2 · SPOT] --> C[3 · CREATE] --> D[4 · PUBLISH] --> A
```

Watch the right creators → **Spot** what's rising →
Create original scripts → **Publish** everywhere

1 · Watch

Add the accounts that inspire you.

Group them — *Angular, Memes, Fitness.*

ReelSpy imports their reels automatically and keeps them fresh.

2 - Spot what's hot 🔥

Virality score on every reel

→ comments count most, likes next, views least.

"Rising Now" ranks by *growth-per-hour*

→ catch the rocket while it's still climbing.

3 - Create in your voice

 **Transcribe** any reel → study its exact hook

 **Hook Library** → every winning opener in one place

 **Claude AI** writes you an original **hook + body + CTA**

Your topic. Your angle. Never a copy.

4 · Publish everywhere

Upload once → post to

Instagram · Facebook · TikTok · YouTube

Per-platform captions. Scheduling. Public/private control.

Bonus: grow on autopilot

 **Comment-to-DM** — keyword → instant public reply + DM with your link, 24/7 (IG & YouTube)

 **My IG** — analytics on your own account + **5 data-driven AI growth tips**

Built right under the hood

-  **Next.js 16 + Supabase + Vercel** — fast, serverless
-  **Claude · Whisper** — best-in-class AI
-  **Row-level security** — your data is yours, tokens never hit the browser
-  **Smart rate-limiting** — shared cache + circuit breaker keeps it reliable at scale

The before / after

Without	With ReelSpy
Hunt for trends	Trends ranked for you
Guess the hook	See it, transcribed
Blank page	Script in seconds
Upload 4×	Upload once
Miss leads	Auto-reply + DM
